35,000,000

Blockchain

The WFDP token is built on top of the Tron blockchain (TRC20) network - using TRC20.

Tron blockchain (TRC20) is a blockchain network designed for running applications based on smart contracts. TRC20 works in parallel with native binance blockchain (tron) as tron blockchain, giving users the best of both worlds: Tron's high transaction capacity and TRC's smart contract capability.

(TRC20) has the advantage over other blockchains as it already has an optimized network with a low transaction cost in its main layer.

Furthermore, it facilitates the transaction of cryptocurrencies with Exchange Binance.

FAQ

How can you buy WFDP coins?

The Token WFDP can be available participation in a private sale or through Vindax.com exchange

You can buy from there official website: www.vindax.com

You can also buy from WFDP Finance and Investment Website : wfdpfinance.com to buy any of them Investment packages .

You can also buy from any exchanges and you can trade:

Total WFDP for Exchange 1 = 12,000,000

Total WFDP for Exchange 2 = 18,000,000

Total WFDP for Exchange 3 = 30,000,000
